 - Case Correspondence activities user can perform
 - New case correspondence received ?

Case Routing, Response Fulfilment, Case Management

- Response fulfilment
 - Written Response fulfilment
 - Response formatting options
 - Custom Response Scenario
 - Escalation & De-escalation
- Case Routing
- Component close & Case Archival
- Case Management & Case Query

What is the MIQ Inbox?

The MIQ inbox module is an effective email management system where the Grifols Medical Information team can manage all the inbound and outbound emails by processing and tracking each medical information inquiry received via email.

IMPORTANT: Any medical information inquiries received in your non-MIQ email account (Outlook) will need to be forwarded to the MIQ inbox.

Benefits of Using the MIQ Inbox

Emails are contained and recorded in the system for a complete audit trail

Easy to Organize and monitor large chunks of emails

Give an instant Reply or Forward an email

Create cases with minimal information and update later

Append emails to existing cases

Mark email as non-case, spam and pending

Hi,

I am Laura, from Texas, US. I am using Emflaza and experiencing Skin Rash. I need intake information of the drug along with any known side effects. Please reply the required details soon.

Regards,

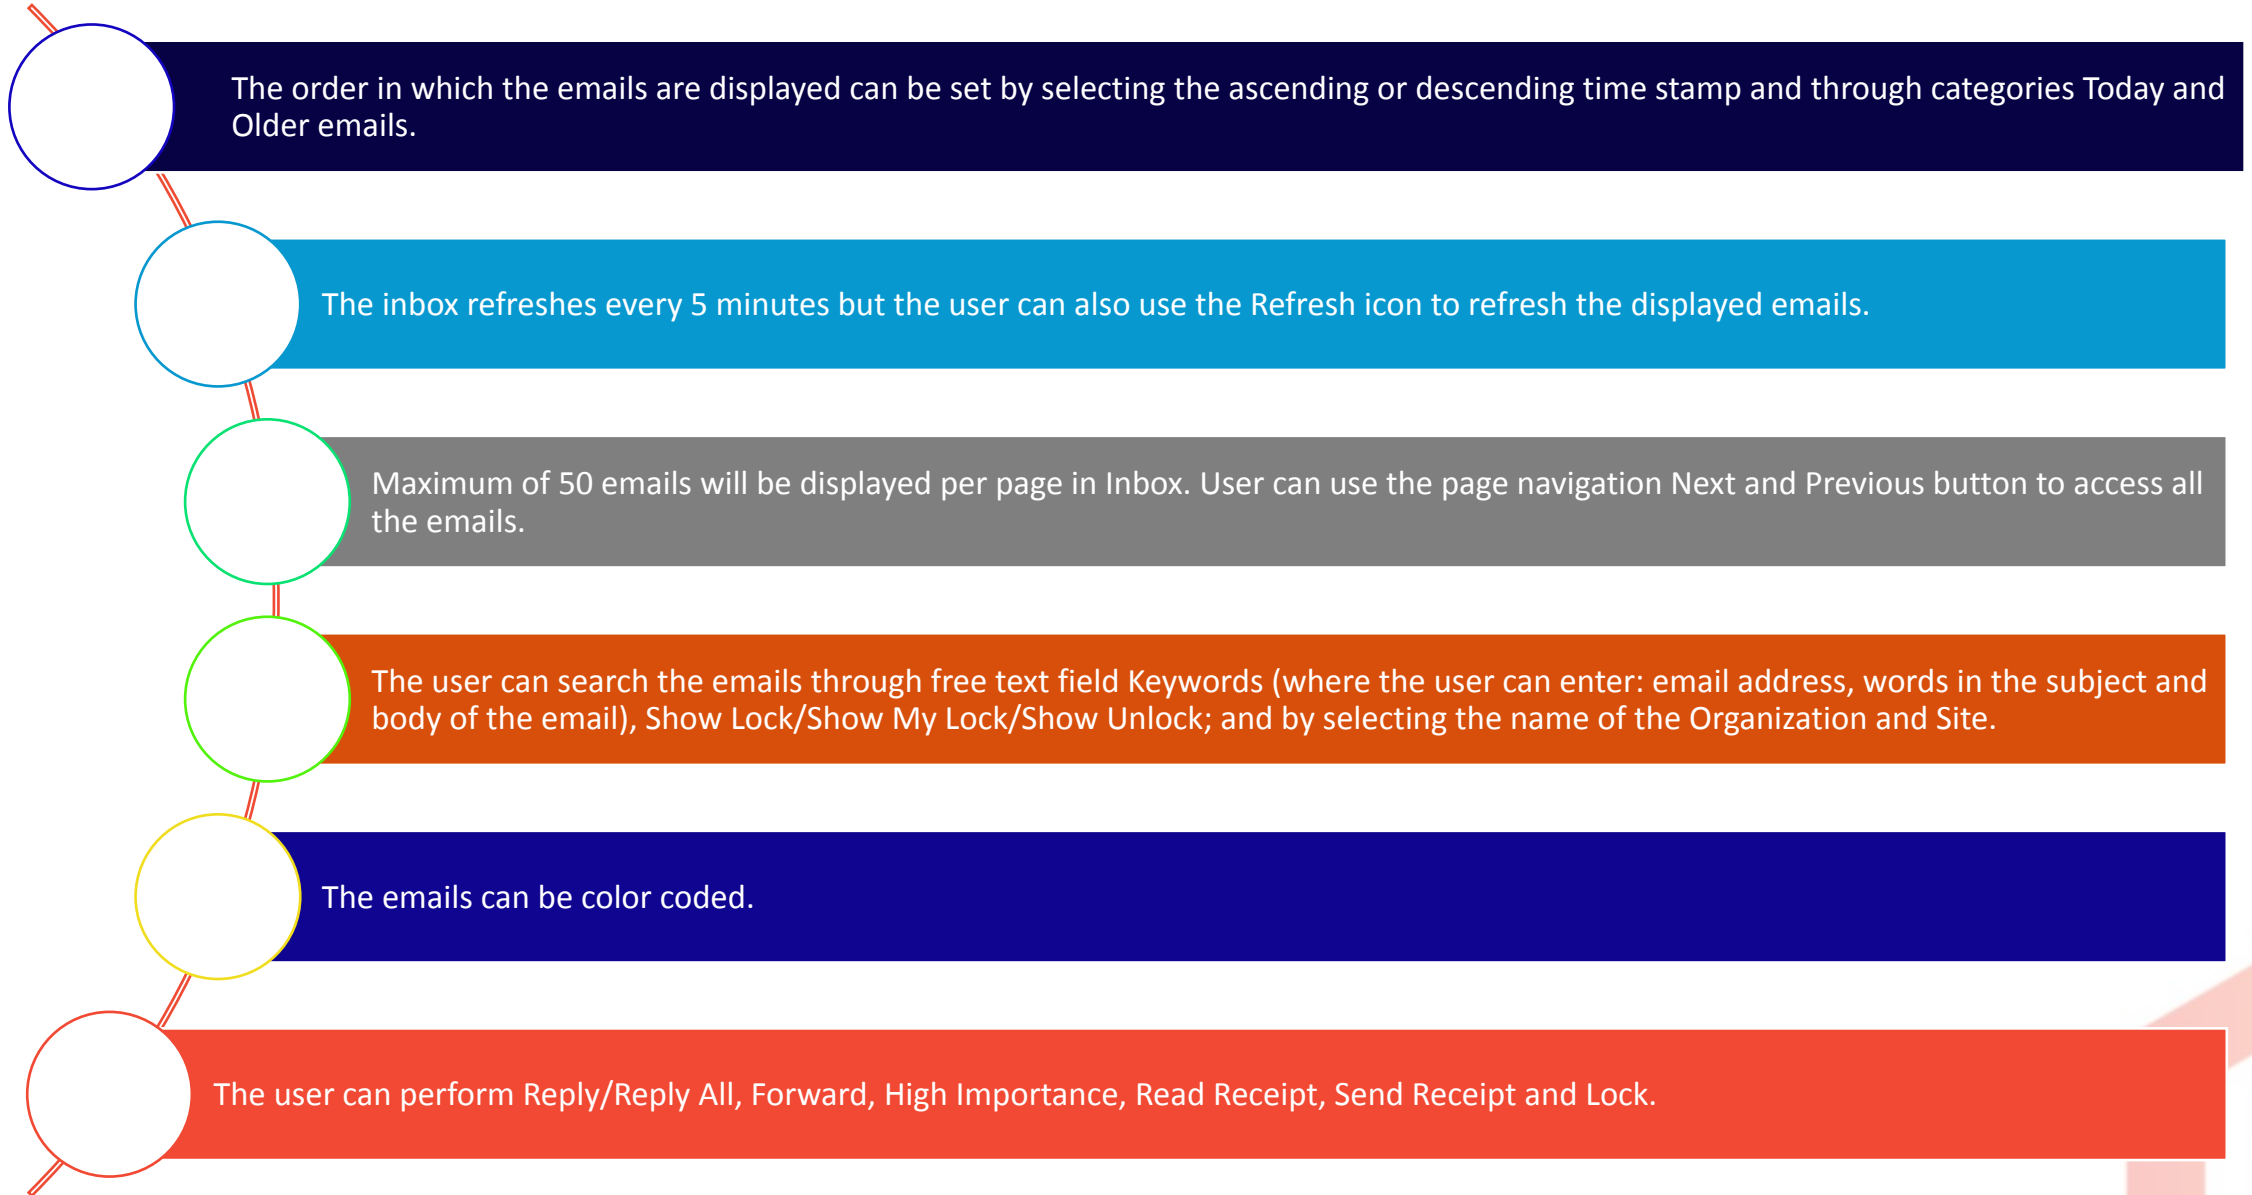

Laura

MIQ Inbox Key Features

MIQ Inbox Key Features Continued...

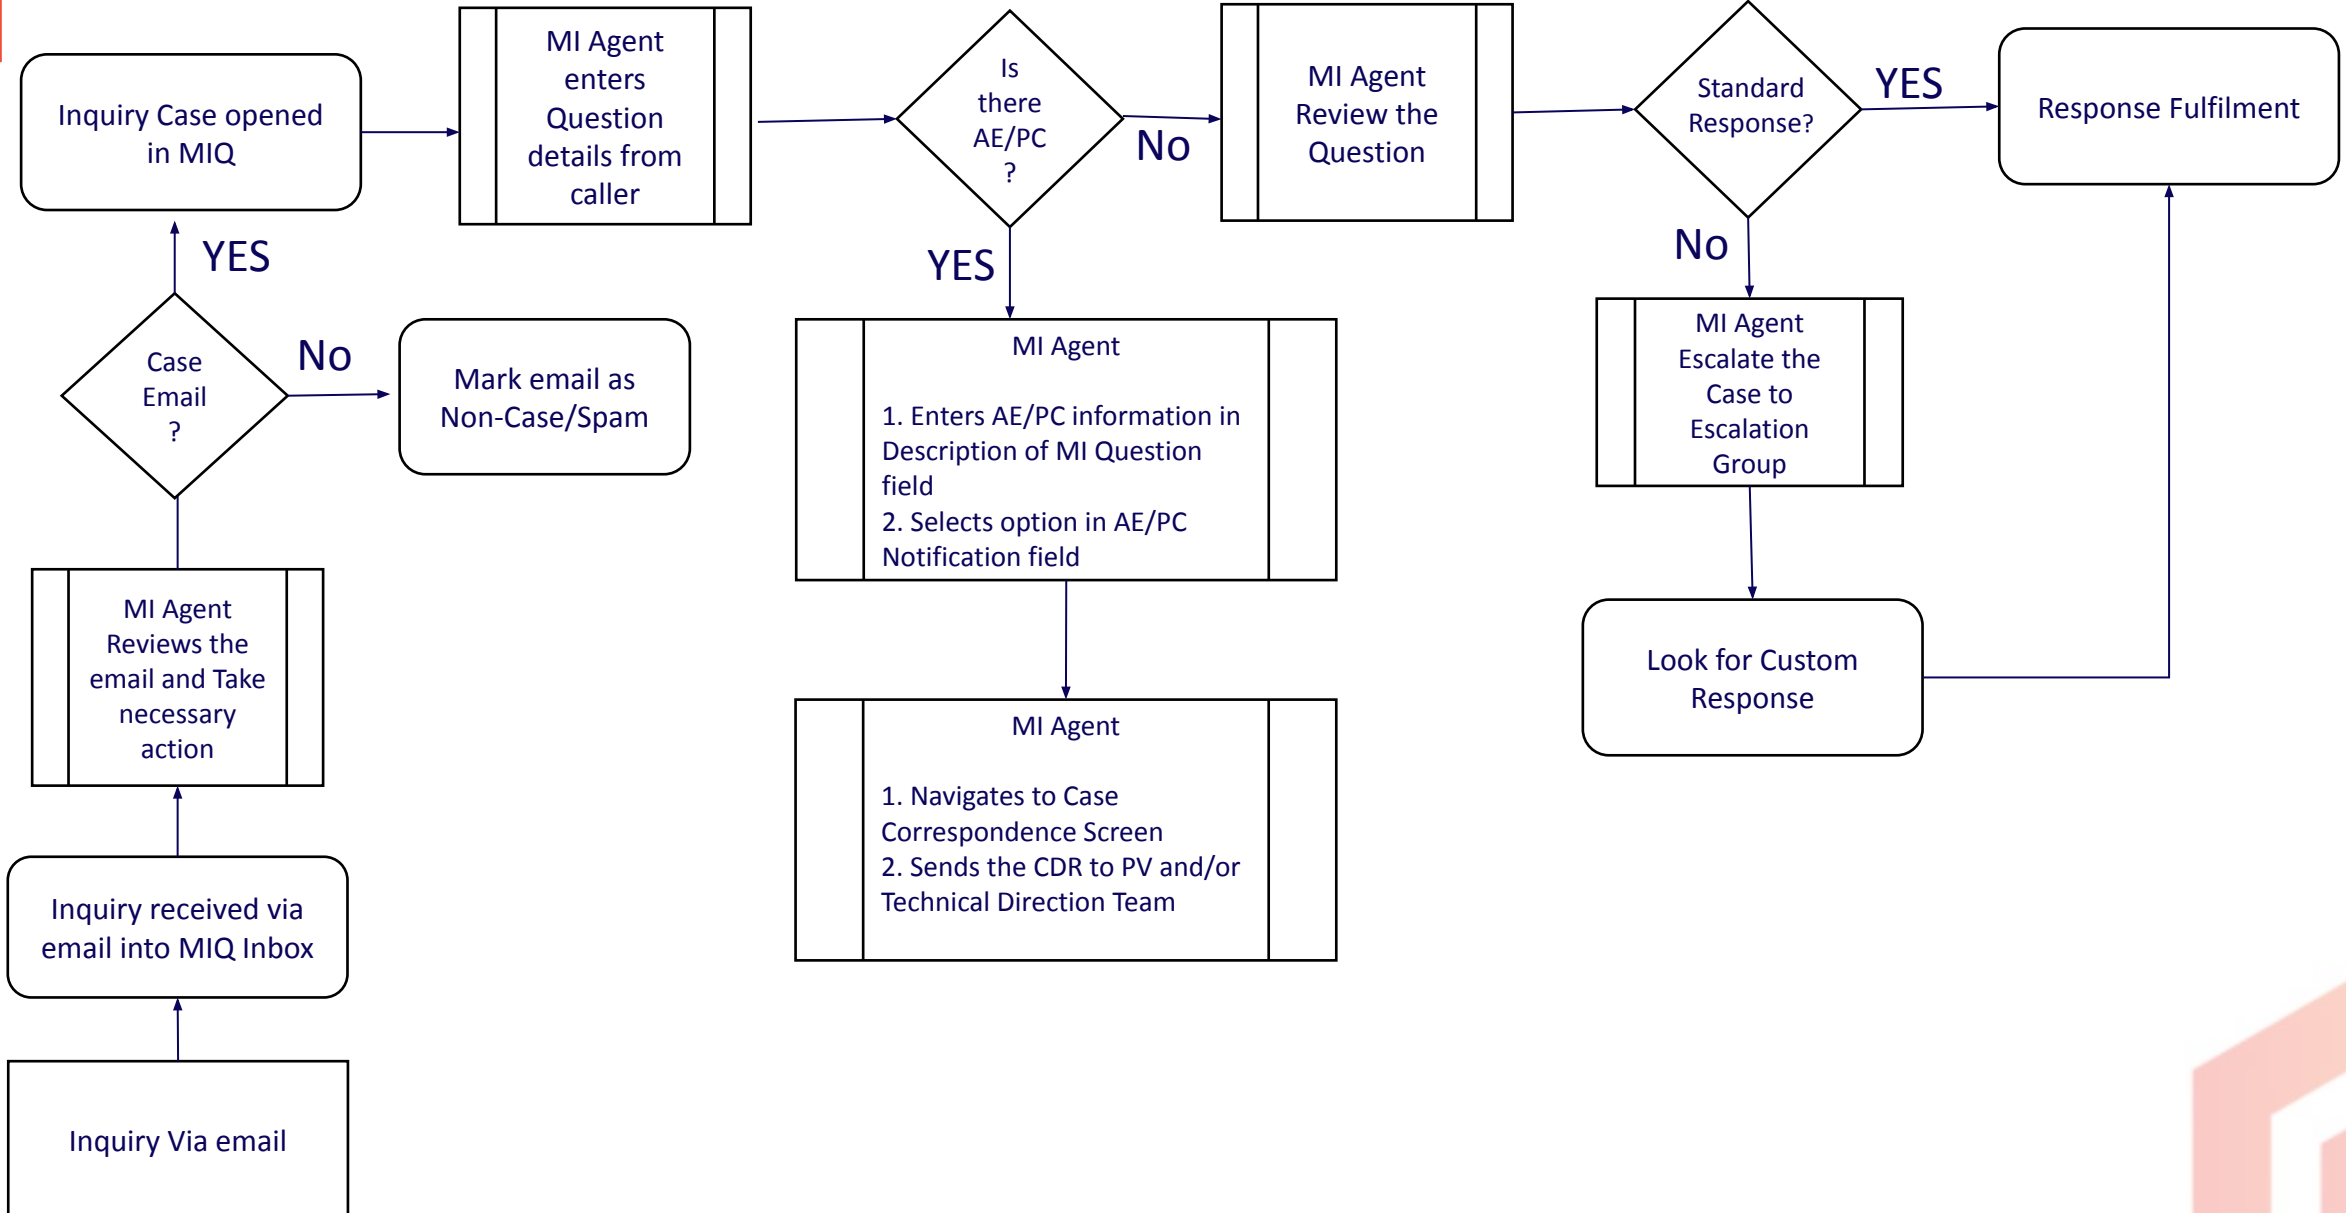

Pending: The emails on which the user has taken some action but are pending closure collect in the Pending tab of the inbox. A user can move emails from the Inbox to the Pending tab by clicking Mark as Pending.

Processed: The emails on which the user has closed the action come to the Processed tab of the inbox. These emails are those which are used to create a case or which are appended to a case.

Non – Processed: The emails which are marked as Non-Case or Spam will show up in the Non-Processed tab of the inbox.

Outbox: The emails which the user has replied, replied all, forwarded or sent receipt come to the Outbox tab of the inbox.

Inquiry via Email (Grifols Process Flow Diagram)

Response Fulfillment Management

Verbal Fulfillment

Access published FAQ's and Documents to provide verbal responses

Written Fulfillment

Share response packages via email, fax and/or print with full tracking done by system

Inquiry Escalation

Escalation of Inquiries when there is no applicable standard response

Response Formatting

Format response package for site/region per organization needs

Content Management

Content available for use from SCIMAX MI CM

CORRESPONDENCE

- What is 'Correspondence' and 'View Correspondence'?
- How Correspondence works?
- Where do we configure?
- Correspondence Alert?

What is Correspondence?

Correspondence module is a repository of the emails generated around a case i.e.; inbound and outbound MIQ emails by tracking each and every received email within each case.

Hello,

Is the Super drug an approved indication for psoriasis and are there any counter indications and frequently reported side effects.

Regards

John Smith

Case Management/Case Queues

1. My Cases: The cases which are in active workflow and the logged-in User Owns.

2. Unassigned Cases: The cases which are in active workflow and now current case owner is assigned.

3. Deleted Cases: The cases marked to be deleted can only be deleted by Marcos.
